)

Nitro drip

What you will need

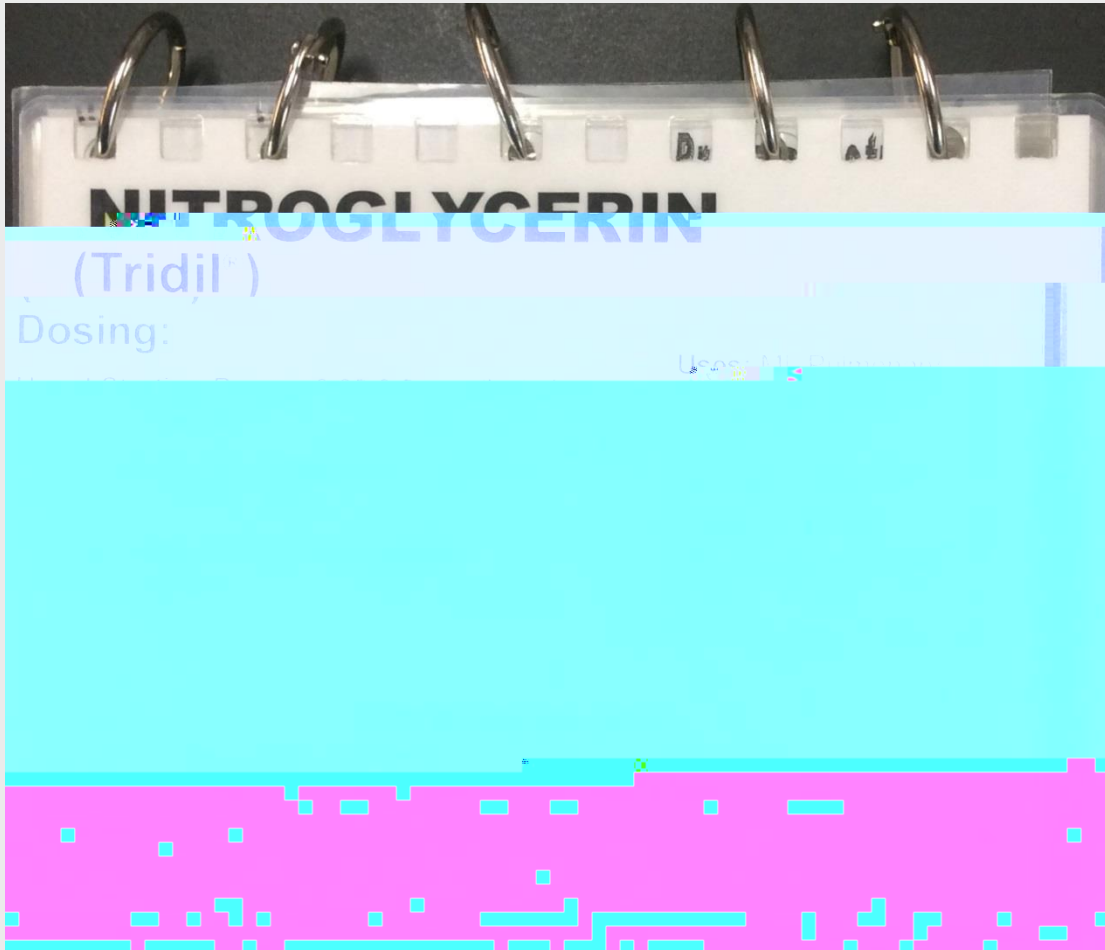

1. Nitroglycerin 50 mg in 10 ml vial from tackle box
2. 0.9 NACL 250 ml bag from scene bag

TGH Policy

- Standard TGH Premix: 50 mg in 250 ml D5W in glass.
 - We don't carry that large glass bottle
 - Can be mixed and used in bags for short periods.
 - 80% of drug leaches into plastic bag with long term use
 - Nitro can be mixed in 0.9 NACL
- Starting Dose Range: 0.25-0.5 mcg/kg/min or 5-10 mcg/min
- Relative **Max** Dose: 2 mcg/kg/min or 200 mcg/min
 - We are Aeromed (The most knowledgeable Flight Crews Ever), we use mcg/kg/min if drug dosing allows!!!!
